*San Francisco, California.*

## THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the causes of the various geological phenomena which we observe in nature. The theory of the earth is a very old science, and it has been the subject of much speculation and controversy. In the early days of the world, men believed that the earth was created by the gods, and that it was the work of the gods to create the world. But as time went on, men began to think for themselves, and they began to ask questions about the origin of the earth. They began to wonder how the earth came to be, and what forces were at work in its development. This was the beginning of the theory of the earth, and it has since become a very important branch of geology.

## THEORY OF THE EARTH

The theory of the earth is a branch of geology which deals with the origin and development of the earth and its various parts. It is a science which seeks to explain the causes of the various geological phenomena which we observe in nature. The theory of the earth is a very old science, and it has been the subject of much speculation and controversy. In the early days of the world, men believed that the earth was created by the gods, and that it was the work of the gods to create the world. But as time went on, men began to think for themselves, and they began to ask questions about the origin of the earth. They began to wonder how the earth came to be, and what forces were at work in its development. This was the beginning of the theory of the earth, and it has since become a very important branch of geology.

37. Farnham Yardley.

The first of these is the fact that the American people are not properly educated in the principles of medicine. They are not taught to distinguish between the different branches of the medical profession, and they are not taught to understand the importance of the different branches. This is a serious defect in our medical education, and it is one which must be remedied if we are to have a properly trained medical profession.

The second of these is the fact that the American people are not properly educated in the principles of hygiene. They are not taught to understand the importance of cleanliness, and they are not taught to understand the importance of proper diet. This is a serious defect in our medical education, and it is one which must be remedied if we are to have a properly trained medical profession.

The third of these is the fact that the American people are not properly educated in the principles of surgery. They are not taught to understand the importance of proper technique, and they are not taught to understand the importance of proper anesthesia. This is a serious defect in our medical education, and it is one which must be remedied if we are to have a properly trained medical profession.

Freshman Glee Club, 1890. 'Varsity Glee Club, 1881-94. Secretary, 1894. Secretary and Treasurer of Weld Rowing Club, 1894. In Comptroller's Office of the N. Y. C. and H. R. R. R. Brother of E. V. Morgan, P. A. '86, and F. G. Morgan, ex-P. A. '87.
